Subject: October 01, 2005 Industrial & Petroleum Hose Price Adjustment

Goodyear Engineered Products continues to take aggressive steps to offset increased costs on raw materials and transportation. These efforts to offset rising cost have been and will continue to be driven by six sigma projects, lean manufacturing methods, and supply chain strategic procurement. Despite these aggressive efforts we have been unable to absorb all the cost increases that our industry is facing on a global basis.

Effective 10-01-05 we are initiating a price increase averaging 7% on industrial and petroleum hose products. All orders **shipped on 10-01-05** and after will be priced at the new prices. Prepaid freight allowances and payment terms remain unchanged.

We remain committed to supporting and growing your business with world class industrial and petroleum hose products. Thank you for your continued business.

Sincerely,

Keith Collett  
North America Marketing Manager  
Industrial Hose & Hydraulics

Bret Hall
